

Heat Seal Film

YC-HMF#27-1

Product Description

- Polyurethane heat seal film has the following characteristics :
- Top Pad and Bottom of CMP Pad Pad for lamination
- Excellent adhesion and workability .
- Heat Seal Temp. : 100~200℃

Product Structure

Product construction

Properties	Unit	Value	Test Method
Total Thickness	μ m	27 \pm 5	Thickness Gauge
Peel Strength	gf/25mm	3,000 \uparrow	SKC Method
Resistivity	Ω	10 ¹⁴	Tester
Heat Resistance		Good	Oven Test
Shelf life		1year	

are based on reliable tests , but since product performance may show different results depending on various factors, it is recommended to use it for reference rather than for the purpose of product performance standards.
